The Hybrid Notes are recorded as interest-bearing debt from an accounting perspective. They have, however, a nature and characteristic which is similar to equity, such as optional interest payment deferral provision, longer maturity than senior bonds and loans, and payment priority subordinated to senior indebtedness, and SBG expects that the Hybrid Notes will be eligible for 50% equity treatment for the principal amount of the Hybrid Notes from rating agencies (Japan Credit Rating Agency, Ltd. and S&P Global Ratings Japan Inc.).

In the event of early redemption or repurchase of the Hybrid Notes, SBG intends to replace the Hybrid Notes with financial instruments which are eligible for an equity treatment from rating agencies equal to that of the Hybrid Notes to the extent that SBG recognizes it necessary in considering its financial conditions, the impact on credit ratings, and other matters.

Detailed terms and conditions including interest rate are scheduled to be determined on June 5, 2026 subject to market conditions.
